Ananya Y. A. Gowda

FULL STACK DEVELOPER · AI / ML ENGINEER · MCA CANDIDATE

Tumkur, Karnataka · +91 72593 27903 · ananyagowda0903@gmail.com · linkedin.com/in/ananyagowda · github.com/AnNanya0903

PROFESSIONAL SUMMARY

MCA (Full Stack) candidate at VTU with **90% in BCA**, building production-grade web applications and AI systems. Experienced in **React.js, TypeScript, Node.js** and end-to-end **ML pipelines** using Python and Scikit-learn. Built an **enterprise AI productivity suite** featuring RAG document Q&A, cognitive voice interface, and multi-provider LLM support (OpenAI + Groq). Recently completed an **AI Internship at Edutainer** applying NLP and supervised learning to real-world datasets. Targeting **Software Engineer, Frontend Developer, Full Stack**, or **AI/ML Intern** roles at leading product-based companies.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C

Frontend: React.js, HTML5, CSS3, Tailwind CSS, DOM API

Backend & APIs: Node.js, RESTful APIs, Supabase

AI / ML: Scikit-learn, TensorFlow, Hugging Face, NLP, NumPy, Pandas, LLM APIs (OpenAI, Groq), RAG

Blockchain: Solidity, Ethereum, Hardhat, MetaMask, Smart Contracts

Databases: MongoDB, SQL, Supabase (PostgreSQL)

Tools: Git, GitHub, VS Code, DevOps (basics)

Core CS: DSA, OOP, Secure System Design, Agile

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern — Edutainer

Feb 2026 – May 2026

Python · Scikit-learn · NLP · Machine Learning · Data Analytics

- Built and deployed supervised ML classification models using Python and Scikit-learn; applied feature engineering and cross-validation to improve prediction accuracy by ~15% over baseline
- Designed end-to-end NLP preprocessing pipelines (TF-IDF vectorization, tokenization, stopword removal) for text classification tasks, reducing manual data processing effort significantly
- Contributed across full ML lifecycle — data collection, EDA, feature selection, model training, hyperparameter tuning, and performance evaluation — following industry workflows

Full Stack Development Intern — Nayoda

Mar 2026 – Apr 2026

React.js · Node.js · JavaScript · REST APIs · Full Stack Development

- Completed an intensive full stack development internship, building and deploying end-to-end web applications using modern frontend and backend technologies
- Demonstrated strong proficiency in full stack architecture, RESTful API integration, and delivering production-ready features with good skills and professionalism

Full Stack Web Development Intern — SCOSS Services, Tumkur

Sep – Nov 2025

HTML5 · CSS3 · JavaScript · Node.js · REST APIs · Responsive Design

- Developed 5+ responsive, accessible web interfaces using HTML5, CSS3, and JavaScript ensuring full cross-browser compatibility and WCAG accessibility standards
- Built and integrated backend REST APIs; implemented event-driven JavaScript and DOM manipulation to deliver complete full-stack solutions for client projects
- Diagnosed and resolved 10+ frontend rendering bugs, improving page load consistency and delivering polished UX for client deliverables on schedule

PROJECTS

CogniFlow — Enterprise AI Intelligence Suite

2025

Python · OpenAI API · Groq · RAG · Voice Interface · LLM · Real-time Analytics

- Built an advanced AI-driven productivity suite featuring a cognitive voice interface, intelligent document Q&A using Retrieval-Augmented Generation (RAG), and real-time strategic analytics dashboard

- Integrated multi-provider LLM support (OpenAI + Groq) with ethical AI transparency; designed for high-performance teams to automate complex professional workflows
- Architected the full pipeline: document ingestion, vector embedding, semantic retrieval, and LLM-augmented response generation

github.com/AnNanya0903/CogniFlow-Enterprise-Intelligence ↗

E-Voting System Using Blockchain

2024

React · TypeScript · Solidity · Ethereum · Hardhat · MetaMask · Supabase

- Engineered a fully decentralized, tamper-proof voting platform on Ethereum using Solidity smart contracts, guaranteeing 100% vote immutability and cryptographically verifiable data integrity
- Architected full-stack solution: React.js + TypeScript SPA, MetaMask wallet-based voter authentication, Supabase PostgreSQL backend, and role-based access control for admin/voter separation
- Deployed and tested smart contracts on Hardhat local blockchain; eliminated single-point-of-failure vulnerabilities through decentralized architecture

Emotion-Driven Music Recommendation Engine

2024

Python · Scikit-learn · OpenCV · Machine Learning · Spotify API · Computer Vision

- Built a real-time facial expression recognition system classifying 7 distinct emotion states via webcam; integrated Spotify API for dynamic, mood-matched playlist recommendations
- Designed full ML pipeline: image preprocessing, HOG feature extraction, multi-class emotion classification model training, and OpenCV live face detection with sub-200ms inference latency

EDUCATION

MCA — Full Stack Development
Bangalore Institute of Technology, VTU University
2024 – 2026 (Expected)

Bachelor of Computer Applications (BCA)
Seshadripuram College, Tumkur University, Karnataka
Completed Aug 2024 · 90%

CERTIFICATIONS & TRAINING

Data Analytics with Python — VTU Elite GOLD (Feb 2026)
AI Internship Completion — Edutainer (Feb–May 2026)
Full Stack Development Internship — Nayoda (Mar–Apr 2026)
DSA Mastery with Java — ExcelR EdTech (30 hrs, 2025)
Full Stack Web Dev Internship — SCOSS Services (2025)
